

WEATHER LOGS FOR TLCV - 2000

The following logs are for January 01 – December 31 , 2000. Each day is divided into 3 approximately equal intervals and given a simple description of sky conditions within the TLCV field of view. These descriptions are intended to be used as a search tool for selecting Time Lapse Cloud Video (TLCV) images and not to provide cloud classifications. For classifications, visit the SGP weather logs. These simple descriptions are the following:

Clear (Clr) – Essentially cloud free.

Mostly Clear (MClr) – A few clouds are evident, but generally cloud free.

Scattered Clouds (Scat) – Clouds are present, but generally not too persistent or dense.

Partly Cloudy (Pcldy) – Similar to Scattered Clouds but generally more dense or persistent.

Mostly Cloudy (Mcldy) – Heavier clouds throughout much of the interval.

Cloudy (Cldy) – Fairly dense cloud cover.

Explanation of notes:

Note #1 : The recording system began suffering tracking problems on occasion; this resulted in picture breakup that is apparent in the compressed video.

Note #2 : Condensation within the optical dome.

Note #3 : Early in the TLCV deployment the automatic white balance of the camera was defaulted to ‘on’ after power dropouts; this was corrected in Feb 1998, but before this sometimes resulted in excessively green or grey video.

Note #4 : Early in the TLCV deployment the z-axis stage positioner allowed the camera to slip down slightly within the TLCV enclosure due to wind buffeting. This caused the rim of the glass dome through which the camera views to come into the TLCV field of view near the edges of the image.

Note #5 : During the course of a year, the shadowband must be reset occasionally; this note indicates that the positioning is slightly incorrect.

Final Note: beginning in August, 2000, a slight ‘banding’ within the images becomes apparent; this is quite mild early on and becomes somewhat more bothersome as the year proceeds. For unexplained reasons, this appears to have corrected itself at the beginning of 2001.
